

FAAST FRAT - Flight Risk Assessment Tool

There are many ways to identify potential hazards associated with flight and to assess the likelihood (risk) that identified and unmitigated hazards could cause an accident or incident. This is the basis for Safety Risk Management. This seminar will introduce and examine how you can use the new FAA Safety Team Flight Risk Assessment Tool , or FRAT, to help identify common risks to GA pilots. The tool will help identify areas of risk that should be considered. And will discuss capabilities that help reduce the risks.

Directions: Seminar will be held in the terminal building at Fleming Field in So. St. Paul. From I-494 take exit 65, 5th Ave 7th Ave. Turn south. Continue south 1/4 mile to stop sign, South Street. Turn left on South Street. Continue 1/2 mile to T intersection, Henry Avenue. Turn right on Henry. Continuing straight on Henry for two blocks will put you in the parking lot of the terminal building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
